CREATE NEW INSTANCES

....

2. FIRST STEPS

DOWNLOAD PAISARQUE

First thing to do is download all application source following this link paisarque.zip and upload it to your preferred server path. In most cases for linux type server, the path should be: **/var/www/html/**

To manage files, it's recommended to use programs as *Filezilla* and *Putty* (Windows). Click logos below to visit download pages:

LITEFILE SERVER

Install and configure litefilesystem.js to process file management and database information. Here you can find all needed help: https://github.com/jagenjo/litefilesystem.js/.
